Environment Technology

- Reduction of environmental pollutants
- Combustion Optimization for oil / gas / gasoline / diesel
- Climate
- See Water rehabilitation
- Drinking Water Treatment
- Medical biological fight against cancer
- Preservation of foods
- Biologist construction
- Regeneration in the forestry and agriculture, Forest restoration, nursery plants
- Biological and conventional cultivation products for livestock?

Entwicklungs-
Forschungsinstitut

Dr. K. H. Fuchs
Entwickler und
Innovationspreisträger

Research Members / Research Support:

Research Project Manager and CEO
Responsibilities: Medical studies and research cooperating with universities and governments Institutions. Bioenergetic DNA analysis to identify homeopathic subtle vibrations:

Dr. K. H. Fuchs

Energy Medicine: Ionen- u. Scalartherapie:
Bioenergetics, cell response::

Dr. med. J. Fischer
Dr. med. W.Eberhard
Dr. med. H. Bilz
Prof. Fritz Albert Popp

Representatives:

Dr. med. S. Ascher
Prof. Dr. med. L. König
Dr. Schreiber
Dr. Ohliger
Dr. H.J. Sautebin

Research support:

Forschungsverbindungen/Unterstützung:
Biologische Universität Wien:
Technische Universität Wien:
Agrarwirtschaft Ungarn:
Bodenkultur:

[Prof. Mag. Dr. Karoline Jezlik](#)
Prof. Dr. H. Hubacek

Combustion Optimization:

Seat of the "Institute for bioenergetic cell resonance" is Munich:
Outer districts: Switzerland: IBL AG, CH-Wil Slovenia: Kristina Vozelj, Kuzmicera 12, SLO-2000
Maribor South Africa: Consa Medical Marketing, Georg von Sable, Johannesburg South
Ausstralien: Dr. med H.J. Sautebin, P.O. Box 296 Mt Barker

Research Connections

Research - water and vegetation:

Bio photonics analysis by Prof. Dr. Fritz Albert Popp at the International Institute of Biophysics "

- Bio photon research

Landesregierung Tirol "Agriculture and Forestry"

- Lake rehabilitation
- Natural algae fight
- Stabilization of Autobahngrünung

Institute of Applied Biology and landscape planning
ORGANIC PLAN (Marine Biological Institute, Rostock)

- Lake rehabilitation

Wastewater Research:

Sewage treatment plants

- Hanau community
- St. Wolfgang (Bay.)

BOKU University Vienna biological (soil culture) Prof. Dr. Karoline Jezlik / Dr Schinagl

- Gardening
- Large attempt in biologically dynamic cultivation

Agricultural Sector:

Government of Hungary Agricultural engineer
Mr Janos Korhammer

- Research on organic farming
- Agriculture and large estates
- Water Remediation

Attempts - snowmaking technology

- Town Wattens, Tyrol
- "Ski Resort Vogelsberg"
- Town Building Imst, Tyrol

Research - Therapeutic support:

- Institute for Biophoton, Heidelberg
Dr. Wolfgang Eberhard

Project IHK Bavaria:

- New Medical Technology for Southern Africa

Technical studies:

- Technical University of Vienna (Meßbereich Silicate Technology) Prof. Dr. Hugo Hubacek (Head d. state. Laboratory of Silicate Technology, Vienna)
- Technical University of Graz (Range Meßtechnik) Prof. Dipl. Ing F. Hochleitner

Technical trials in the field
Combustion Optimization:

- BOSCH / Siemens, Munich
- Przedsiębiorstwo Komunikack Samochodowej Spedicii (Poland)
- Ministry of Environment, India Environment Arga Wil

Press releases:

- In over 16 journals in three countries, As well as in numerous newspapers

Television appearances:

- Polish television Warsaw
- ORF 2, Austrian Television
- Television Slovenia (Maribor)

Research - Therapeutic support:

- Institute for Biophoton, Heidelberg
Dr. Wolfgang Eberhard

Project IHK Bavaria:

- New Medical Technology for Southern Africa

Technical studies:

- Technical University of Vienna (Range Silicate Technology) Prof. Dr. Hugo Hubacek (Head d. state. Laboratory of Silicate Technology, Vienna)
- Technische Universität Graz (Bereich Meßtechnik) Prof. Dipl. Ing. F. Hochleitner

Our main objectives

- Natural regeneration
- Biological purification of water
- Therapeutic measures
- Bio resonance u. In Photonic Therapy[®]
- Enhancement of food
- Biological applications in the field of forestry and Agriculture, gardening equipment, gardening and the entire vegetation
- Organic farming
- Livestock
- Energy saving measures
- Reduction of environmental pollutants combustion optimization oil / gas / gasoline / diesel

Training

- Therapeutic applications of In Photonic Technology[®]
- Possibilities for the nature - Bioenergetic therapy
- Bio-resonance therapy
- Water: Biochemical and bioenergetic Cleaning natural antialgae

Our development and scope of In Photonic Technology

- Manufacture of process equipment in the field of bio-resonance, bio-device (based on in-Photonic[®]) for physicians, surgeons and Private individuals
- Manufacture of homeopathic medicines Globule (Sugar) and transmission systems
- Shelf life of food by making cell activation
- Biological for Healthcare
- Physical water
- Improving the quality of drinking water
- Biological fouling and algae control in lakes, Aquariums, water tanks of all types and similar constructions
- Improvement of growth in nurseries and in agriculture and forestry
- Reduction of pollutants in combustion motors and the heating
- Manufacture of biological resins and plastics
- Manufacture of bio-generators for Air conditioning (climate improvement)

Environment engineering Innovation prize 1999 in environment engineering

On behalf of the entire development research team and we would like the jury at the Innovation Fair in Baden-Baden for the award on the biophysical properties in Area of the entire nature. Competition from more than 200 participants We received the 1st Price

Copyright:

The development of in-Photonic[®] Technology is protected by copyright laws. There are no tours of the production approved, nor detailed information on Technology issued. The blueprints were notary sealed and are constantly added.

The In-Photonisierung process industry, we provide a service for this and offer support for

- Product training
 - Technical seminars
 - Customer Service Consulting
 - Talks
 - Presentations at conferences
- and further

On the subject of bio-energy:

The existence of all life is based in accordance with the present findings of modern science at Uren of bio-energy (sunlight). Causes of forest and water dying, and many diseases are mainly on the effects of pollution back-feed.

Use:

By strengthening the principle of natural BioPhotometering energy (cellular radiation or ultra-weak cellular version) with the In-Photonic[®] process, we support reliable, energy shortages caused by degenerative nature, with full power energetically. This allows us the nature, humans and animals, water and vegetation throughout the support.

In-Photonic transmission plasma laser technology

In-Photonic Technology

Laser plasma technology transfer In a scientific research project in which various specialists involved, developed Dr. K.H Fuchs and his research group, the "Photonic-In" technology. Prisms, coils, specially developed materials and vacuum-shooter with photo compression method can be found in the In-photon generators. Here, in the broadest sense in the development of solar technology, which in the atmosphere and the solar photons compressed. This cell-supporting information will be on silicon crystals as a storage medium on a permanent transfer. This creates a new type of laser writing system of the transmission technology with a high calorific value. In computer jargon, one speaks of writing a CD. These are the so-treated silica beads in the unit size of particles up to 5 mm for different purposes and will support the Tax processes of DNA function. Thus in two decades of developing a mature biotech innovation. Through the promotion of reliable information within the DNA and RNA, so we support targeting the bioenergetic, biochemical and biophysical function to stabilize all life. We developed custom application equipment or Energy products include a base material "in-photonisierte Energy silicon crystals.

Preface

Our Lives

The origin of all life is billions of years prior to the first life back in the water. Without the sun and the water would be no life on our planet exists.

The oscillation phenomenon of the "bio-resonance of nature" is, according to the latest findings and scientific evidence of biophysics in the frequency range of the cell with a 1013 Hertz and is consistent with the frequency, i.e. the energy of sunlight (photons-BIO) and the same as those of the water molecule movement and the frequency of the quartz crystal, the rock, respectively. So does all life on earth by the high energy level of the atmosphere in constant regeneration bioenergetics (cellular stabilization). The origin of life will contribute to energy conservation of man, animals and vegetation in the whole of life and offer only the necessary existential bases.

This rule applies no longer

Due to the pollution, the natural regeneration of energy no longer enough to protect against these pressures to offer, said the research at the Institute for Cell bioenergetic resonance "(our research department). We know the consequences: disease, fatigue appearance, performance, inheritance, lifeless water, deforestation, pollution, etc. Electro-smog charged man and the environment is enormous.

In the conventional live food often lacks sufficient supportive information, but to find information as well as pollutants in our drinking water.

We humans are far beyond the borders of the nature of life support available energies gone. Today we must accept the consequences. The biological balance has long been out disjointed. They weaken not only our physical body but also the psyche. The reduction of happiness hormones lead to depression, the inclusion of pollution do you rest. We are against such attacks without defense exposed. The use of in Photonic® environmental technology and medical technology is recognized worldwide, they stabilize, protect and stabilize the human nature.

Influences of the environment

We must admit that the industrial development that we should make life easier is against nature. The consequence is that more and more people are exposed. Think of the serious environmental pollution, especially at the electro-smog. You rob us the necessary power and speed so that the diseases of civilization. We humans are made of a very complex organism, with approximately 70 trillion highly sensitive cells, each of which has about 100,000 in the second information processing to the entire body to steer. They are sensitive to homeopathic preparations. In the cellular communication function as the hardware of a computer. There are subtle energies, so switching functions provided by electromagnetic fields, which we are exposed daily, strongly influenced. They often lead to energy blockages, disease to cell degeneration, i.e. cancer. It affects people with very little energy.

Slide the antenna of a pocket radio, so that there is no reception and we touch them, we hear music again. We take people to electromagnetic waves. We are the modern biological garbage chute of the environment. Furthermore, we still need the dirt in the air after it by the electromagnetic fields is positive (positive ions) is loaded with the great disadvantage that the dirt and dust, odor molecules, pathogens, etc. in the air remain.

Nature has a Negative ionisierung for our air, which the dirt fall to the ground would make. Misshapen our living environment is against nature, committed to defend white. Even in our living room holds the dirt in the air. Where are the increasing numbers of house dust allergies increasing? Or allergies in general?

In-Photonic® - Biotechnology

Our In-Photonic® - Environmental was awarded the "Innovation Award" award. This energy is identical to our cell and serves to protect against environmental stress, therapeutic support and regeneration of the entire biological structures.

We peoples needed four times more energy today

The research at our Institute for bioenergetic cell resonance "show that we are for balancing today is four times more energy is required. From more than 4000 subjects tested, we have a bioenergetic DNA analysis on the bioenergetic stability studied, only 5% in the standard. 95% are exposed to. Which show approximately 65% bioenergetic DNA damage. Thus, the disease's destructive path. In rare cases, not this means then the drug addiction. In the Munich newspaper "TZ" was alarming following article: "79% of all severe and moderately severe poisoning in 2002 were caused by drugs!"

We need to improve the quality of life around bioenergetic stability by energy reserves, the bioenergetic compensation offer. Through the In-Photonic® - Environmental reach depending on the individual application to the multiple of energy reserves and thus protects the cells against stress.

Negative influences on the environment

The training of our modern ways of life is characterized by a plethora of changes in our eating habits, both by the nature, quality and origin of our food as well as by the properties of our environmental circumstances. It is now inundated by environmental toxins, physical or electromagnetic origin, of gases or metals came (e.g. computers, artificial light, GSM, ozone, CO, mercury ...), as diverse as harmful and resistant to adverse effect on our life practice.

In addition, suffering mental origin, such as stress. He is mostly a social and professional environment, was based on the high standards to make to itself and provides performance, events such as job loss or failure of goals. Frequent follow the disintegration of the family in his cell bioenergetic function with fatal consequences: they do sting on the well-being and interfere with the DNA sequence biochemical malfunction, ultimately on the reduction of bio electro magnetism organ function affect the whole organism. These findings and relevant measurements have led us, both in the diagnosis as well as in the treatment and restoration of wellbeing bioenergetic for new ways to look primarily to the cell function and to stabilize the flow of information. Today show by reliable scientific evi-

dence, the effect of cell-supportive measures on the development of intra-Scalar-modules new therapeutic aspects.

In a fruitful collaboration with universities, the Institute for Cell bioenergetic resonance, with his medical knowledge to support research projects, we were able to develop all-encompassing variable method to the above-mentioned disorders and diseases bioenergetically and informally to treat.

The research and especially the work of German physicist Popp have demonstrated that the DNA of a kind of "electromagnetic antenna is, the information on the scale Rebene from the immaterial organizing principle and the Information legitimacy takes to make them pass into our cells.

All these findings with our new environmental Technology benefit the progress.
